

YEAR 12 – BRIDGING UNITS

A-LEVEL MATHEMATICS

ST HILDA'S
COLLEGE

The 6th Form
@ St Hilda's

BRIDGING
UNITS

Name:

Anything is
POSSIBLE

Welcome to A-level maths

Setting yourself up for success

To ensure you make a smooth start to advanced study, you need to ensure you have solid GCSE skills in the following topics: proof, geometry, indices and surds, equations of circles and lines, trigonometry, quadratics and algebraic manipulation.

To demonstrate you are confident in these topics, you must complete the “Transition to A-level Mathematics” course on the Integral website, which we estimate will take you 15 hours. Use the following URL or QR code to access the course:

<https://amsp.org.uk/transition-to-a-level-mathematics-course-2024/>

- Scroll down the page and register as a student
- Apply for an account using a personal email account
- Verify the account
- Log in with the details emailed to you and you will be prompted to change your password

Now you're in the course. For each of the 7 sections of the course, watch the videos and examples, then attempt and submit the assessment. Do not attempt all assessments in one go, pace yourself!

Only one attempt is possible for each assessment so please ensure you have attempted all questions to the best of your ability before pressing submit.

At the end of the course, please print off your certificate or download it on to your phone as evidence. It will look like the one opposite.

The deadline for producing your certificate is Monday 16th September.

If you encounter any problems, please email mmurray@st-hildas.co.uk.

We look forward to meeting you properly in your first lessons in September,

Mrs Murray, Miss Harrison & Mr Walsh
